INITIAL SITUATION

I INITIAL SITUATION

About Kickstarter

- Global crowdfunding platform
- Mission: **“Help bring creative projects to life”**
- launched in 2009
- Projects only receive funding if the goal is reached
- \$4.6 billion in pledges (Dec 2019)
- about 17.2 million backers funded 445,000 projects

I INITIAL SITUATION

Our Data Source

- Data comes from a scraping service:
<https://webrobots.io/kickstarter-datasets/>
- Snapshot of “all” project (scraped 18.11.2019)
- about 185.000 projects after removing duplicates

I INITIAL SITUATION – TASK

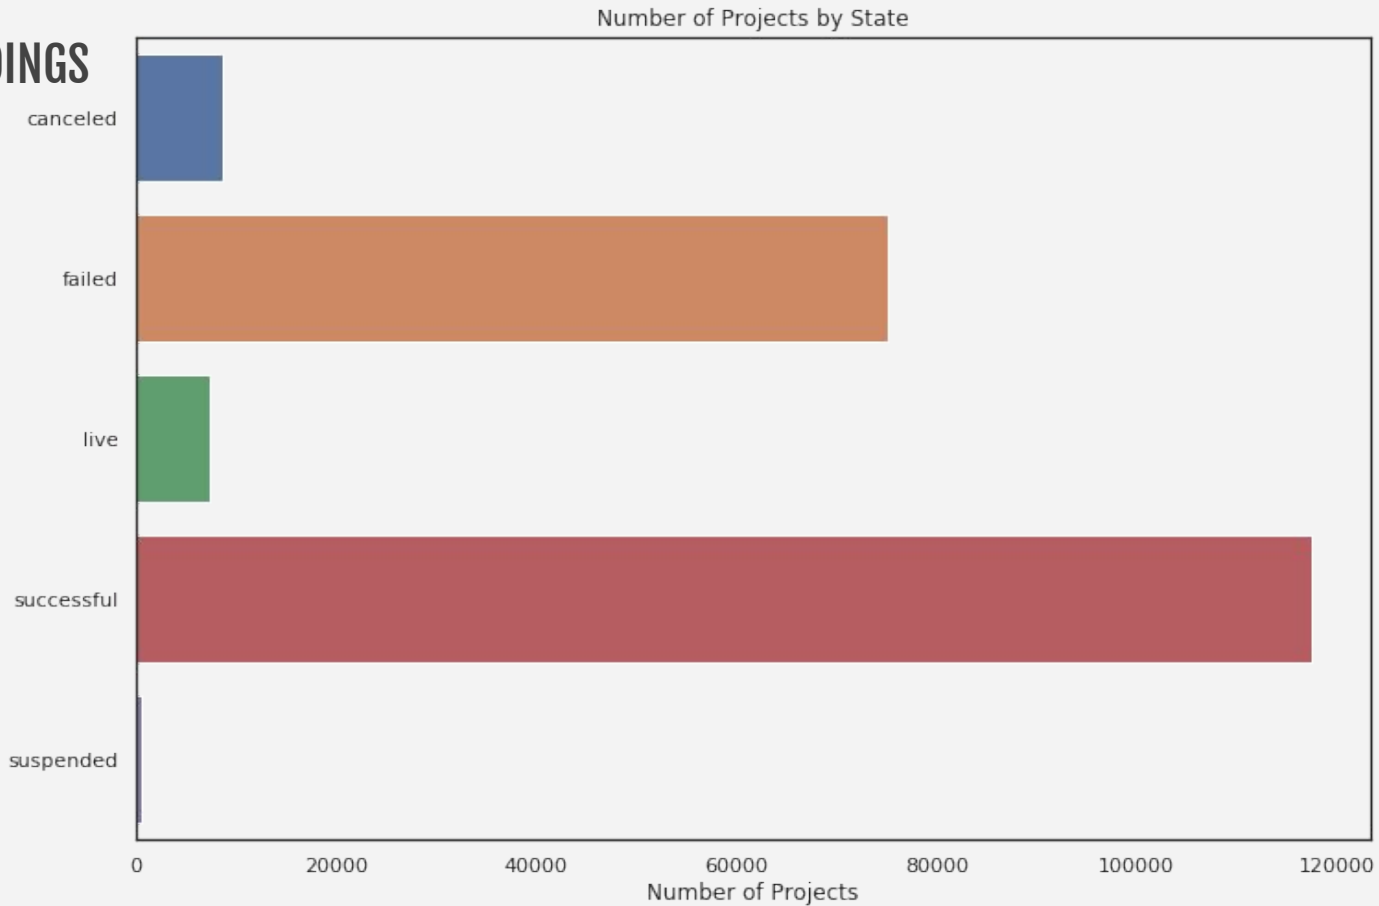

Creation of a model to predict
the success of a campaign
(based on known project data)

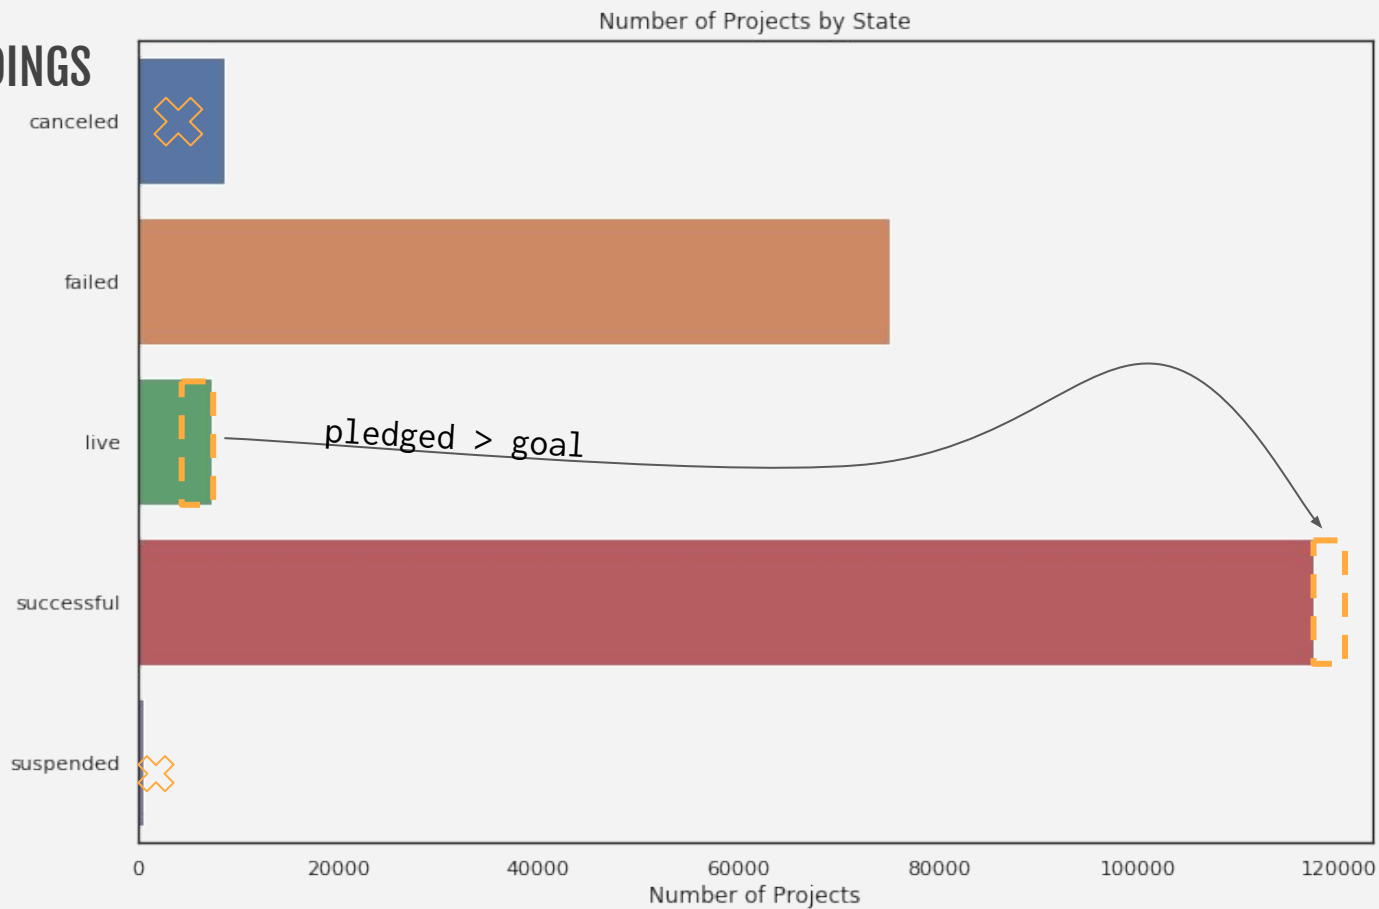

Recommendations of how to
optimize a project for success

FUTURE WORK

V FUTURE WORK

Low Hanging

Full-data-view, we are looking at roughly 45% of the potential data.

Investigating **ROC curves** to visually compare different models and improve upon them.

High Hanging

Pictures for many campaigns are available. Do their colors and displayed objects correlate with success?

**WOULD YOUR PREDICT
SUCCESS OR FAILURE?**

ASKED FOR \$7,000.
GOT \$ 46,000.
